

How-to Guide to Display Ads by Sort (Alpha)

By default, ads are displayed randomly and in any order. However, you have the ability to sort ads for example alphabetically. This may be desired if you want to use Ad Peeps to have a directory of advertisers or other use where random display is not desired.

In order to enable this feature, generate the HTML Code as you normally would, and then add `&bsortcolumn` `=<column_name>` to the Javascript (Enhanced Image) HTML Code.

Example

```
: <!-- START text Ad Peeps Ad Code -->
<p align="center">
<script type="text/javascript" src="http://demo.adpeeps.com.com
/beta/adpeeps.php?bf=showad&uid=100000&bmode=off&
&gpos=center&bstyle=default&bzone=default&
&bsize=text&btype=3&bpos=default&btotal=1&
&btarget=_blank&bborder=0&bsortcolumn =ad_title">
</script>
</p>
```
